

Go Fish

Feb. 2, 2008
3 p.m.

EXPECT A SELL-OUT -- THEIR SHOWS ALWAYS ARE.

Go Fish started as an A cappella group, using nothing but vocals and percussion. A cappella with an attitude is what it was branded. The guys have made quite a journey musically and experimented with other styles, still focusing on vocals and harmony, but also adding some instrumentation. They are now back to what gave them their start, but all that much wiser and more determined to make their way in the industry with a different style of music.

Go Fish was founded by Jamie Statema back in the mid-90s with the intent of being able to offer something different musically. Go Fish has two passions in life; to tell people about the number one thing in their lives, which is Jesus Christ, and to have as much fun as humanly possible!

The a cappella trio comprised of 3 young men, 2 of them fathers, have toured across the country and sold over 500,000 albums. Jamie, Jason and Andy, those "Go Fish Guys," possibly because of their experiences with parenthood, have directed their ministry at children and their parents, with joyous results. Their CDs "Splash," "Superstar," the recently released "Snooze" and this new DVD, "Showtime" are all winners. "Showtime" features songs from "Splash" and "Superstar," and it is performed before (and with) an adoring, excited audience of kids and their parents. Interspersed with songs and silliness at the local county fair, the guys perform "Superstar," "I've Got the Joy," "The Crazy Dance," "The Ten Commandment Boogie," "This Little Light of Mine" and "That Acappella Sound."

"Showtime" is advertised as "Great music for kids that won't drive their parents bonkers!" —indeed, far from it, people of all ages in the audience are up, dancing and singing along.

HITS

Superstar

I've Got the Joy

The Crazy Dance

The Ten Commandment Boogie

This Little Light of Mine

That Acappella Sound

Take Me Away

You're My Little Girl
